

Jiwon Kim

Seoul, South Korea · (+82) 10-6361-9410 · kim.jiwon@ewha.ac.kr

Last Updated: October 2026

RESEARCH INTERESTS

Methodologies: Combinatorial Optimization, Sequential Decision Making, Matheuristics

Applications: Logistics & Supply Chain Management, Decision-Making under Uncertainty

EDUCATION

Ewha Womans University, Seoul, South Korea

M.A. Student in Business Administration (Management Science)

Sep 2025 – Present

B.B.A. in Business Administration & B.S. in Statistics (*Double Major*)

Aug 2025

PUBLICATIONS & PREPRINTS

Moon, J., **Kim, J.**, Lah, Y., Han, Y., & Kang, Y. “Beyond Averages: Evaluating LLMs on Human Survey Replication at the Distributional Level.” *arXiv preprint arXiv:2606.09013*, 2026. [arXiv]

Kim, J. & Min, D. “Assessing the Validity of Prompting Large Language Models for Vehicle Routing Problems.” *Korean Management Science Review*. *Accepted, 2026*.

PATENTS

Hierarchical Synthetic Persona Generation Method Using LLM and Multimodal Inputs.

Korean Patent Application No. 10-2025-0212331. *Co-inventor; pending*.

GRANTS & FELLOWSHIPS

Master’s Student Research Fellowship, National Research Foundation of Korea (NRF) *2026*

Principal Investigator · KRW 12,000,000

Two-Stage Matheuristic for Transportation Volume Reallocation

RESEARCH EXPERIENCE

Graduate Researcher, AAPL Lab, Ewha Womans University

Sep 2025 – Present

Advisor: Prof. Yunchool Kang

Transportation Volume Reallocation and Scheduling

Co-advised by Prof. Seokgi Lee, Youngstown State University

- Developed MILP- and search-based methods for joint transportation volume reallocation and scheduling under operational constraints.
- Studied sequential decision formulations using Markov Decision Processes and Monte Carlo Tree Search.

LLM-Based Human Response Simulation

- Studied the validity of LLM-generated human responses at individual and distributional levels.
- Examined persona representations, prompting strategies, and multimodal conditioning.

Research Assistant, School of Business, Ewha Womans University

Sep 2025 – Mar 2026

Advisor: Prof. Daiki Min

Research on large language models for capacitated vehicle routing problems.

TECHNICAL SKILLS

Programming: Python, R

Optimization & Machine Learning: Gurobi, OR-Tools, PyVRP, PyTorch

RELEVANT COURSEWORK

Optimization Theory, Sequential Decision Making, Bayesian Statistics, Operations Management, Supply Chain Management, Data Science
